The Future of Finance

Digital is transforming the #FutureOfFinance and shifting from cost to value, creating:

- A change in responsibilities
- New technologies
- New skills, competencies and mindset

Skills

Over 50% agree that current finance competencies will need to change significantly over the next three years.

The top 3 skills gaps are:

1. Business partners
2. Data and analytics
3. Business solutions architect

Combined with the right digital skills and mindset:

1. Basic digital literacy to work in a digital environment
2. Technology know-how where deeper expertise is needed
3. Mindset and behaviours to succeed in a digital environment

30% identify that the finance function is evolving towards a pentagonal shape in the digital age.

This shift creates the opportunity for a rewarding career in finance, and to drive real value to organisations.
