The fog of economic uncertainty which has been a dominant feature of the CFO Survey for the last five years showed some signs of clearing in the first quarter.

Chief Financial Officers’ perceptions of macroeconomic and financial uncertainty have dropped to a two-and-a-half-year low. And, despite the crisis in Cyprus, CFOs are more confident that the euro area will hold together. Lower uncertainty has lifted business confidence for a third consecutive quarter and corporate appetite for risk is not far off the peaks seen in early 2011 when Europe looked set for a sustained recovery.

Reduced stress in financial markets has delivered improvements in credit conditions for large UK corporates. CFOs say credit is more available and cheaper than at any time since the survey started in September 2007.

CFOs have edged away from their previous emphasis on cost control and cash flow. Our index of corporate defensiveness, having trended higher for years, has declined sharply.

British business looks set to benefit from a less risky, and improving, global economic backdrop. UK-based businesses with strong overseas exposure are shifting towards more expansionary policies. UK-focused businesses remain defensive, but optimism among these companies has risen too.

Overall this quarter’s survey shows a strikingly broad-based rise in confidence among the UK’s largest businesses.
Optimism rises

CFO optimism about financial prospects for their own companies has risen for the third consecutive quarter.

Companies that generate a large share of their revenues abroad and those that are more UK-focused have both become more optimistic.

Greater optimism among CFOs is also reflected in the continued easing of their fears of a euro breakup, despite the crisis in Cyprus.

CFOs now attach an 18% probability to the euro breaking up in 12 months – exactly half the level last summer.

Our panel of CFOs, mostly representing large UK corporates, also report a continued improvement in credit conditions.

CFOs report credit is cheaper and more easily available now than at any time in the past five years.
Investment drivers

This section compares CFO sentiment on nine key drivers of corporate investment today and six months ago. The big message is that improving macroeconomic and financial conditions are easing the constraints on business investment.

The radar chart below rates CFO sentiment on a score of zero to ten, with ten the most positive. The blue line depicts CFOs’ assessment six months ago; the green line shows the current position. CFOs are more positive on eight out of the nine drivers, thus the green line almost envelops the blue line.

CFOs’ biggest worries, denoted by low absolute scores on the lines, relate to economic uncertainty, the weakness of the euro area and fiscal consolidation in the UK. But, encouragingly, they are less worried today about weak growth in Europe and uncertainty than six months ago. Concerns about UK fiscal consolidation have increased, but only marginally.

CFOs are most optimistic, and increasingly so, about prospects for long-term growth in demand for their own products and economic activity in emerging markets, the US and the Asia-Pacific region. Sentiment on the cost and availability of finance has also improved, and CFOs do not see credit conditions exerting a dampering effect on investment.

Chart 5. Factors affecting corporate investment plans
CFOs’ assessment of the effect of each of the following factors on their investment plans: Q3 2012 (blue line) and Q1 2013 (green line)
On a 10-point scale where 0 implies the most negative effect and 10 the most positive.
Rising risk appetite

In recent months investors have increasingly turned to risk assets, such as equities, in search of higher returns.

The S&P 500 has gained 10% this year hitting an all-time high in the first week of April.

CFOs’ attitudes to risk tend to mirror those of investors. Corporate risk appetite rose to almost a two-year high in the first quarter.

Companies that derive most of their revenues from foreign markets display a significantly greater appetite for risk than their UK-facing peers.

Expectations for an increase in corporate revenues also rose in the first quarter.
CFOs less defensive

CFOs are placing less emphasis on defensive strategies, such as reducing costs and increasing cash flow, than in the previous quarter.

Nonetheless, cost reduction and increasing cash flow remain the top two priorities for corporates, albeit by a narrowing margin.

Our index of corporate defensiveness, having trended higher for two-and-a-half years, has dropped sharply.

Chart 9. Corporate priorities in the next 12 months
% of CFOs who rated each of the following as a strong priority for their business in the next 12 months

- Reducing costs: 42% (2013 Q1), 50% (2012 Q4)
- Increasing cash flow: 39% (2013 Q1), 49% (2012 Q4)
- Introducing new products/services or expanding into new markets: 35% (2013 Q1), 34% (2012 Q4)
- Raising dividends or share buybacks: 8% (2013 Q1)
- Expanding by acquisition: 17% (2013 Q1), 12% (2012 Q4)
- Reducing leverage: 13% (2013 Q1), 11% (2012 Q4)
- Increasing capital expenditure: 15% (2013 Q1), 20% (2012 Q4)
- Disposing of assets: 6% (2013 Q1), 8% (2012 Q4)

Chart 10. CFO priorities: Expansionary vs. defensive strategies

Arithmetic average of the % of CFOs who rated expansionary and defensive strategies as a strong priority for their business in the next 12 months. Expansionary strategies are introducing new products/services or expanding into new markets, expanding by acquisition and increasing capital expenditure. Defensive strategies are reducing costs, reducing leverage and increasing cash flow.
Overseas markets beckon

International companies, those deriving more than 70% of their revenue from outside the UK, have decisively shifted from a defensive to an expansionary stance.

UK-facing corporates, those deriving less than 30% of their revenues from abroad, remain defensive.

Lower costs and improved availability of credit have ensured that raising debt, through bond issuance or bank borrowing, remains the most attractive form of financing for our panel of large corporates.

Equity issuance has also gained favour among CFOs.

CFOs consider equities to be overvalued for the first time in three years.

Government bonds continue to be seen, as they have been for five years, as the most overvalued asset.
Economic and financial context

The macroeconomic backdrop to the Deloitte CFO Survey Q1 2013

Economic activity in the UK and the euro area appears to have stagnated in the first quarter and growth forecasts for 2013 have drifted lower. However, the British Chambers of Commerce reported a rise in optimism among small UK companies. Market nerves about the US deficit eased and US housing and employment activity improved. The outlook for growth in emerging markets improved as fears of a ‘hard landing’ eased. The bold monetary and fiscal stimulus policies introduced by Japan’s new government led to a strong rally in Japanese equities and boosted confidence about Japan’s growth prospects. Financial markets continued to strengthen, with the UK FTSE 100 up 8.7% between January and the end of March, and the S&P 500 and Dow Jones Industrial Average reaching all-time highs. Financial market optimism was only briefly dented by the €17 billion bailout of Cypriot banks. The episode set new precedents with private depositors being forced to contribute to the rescue and the imposition of capital controls.
About the survey
This is the 23rd quarterly survey of Chief Financial Officers and Group Finance Directors of major companies in the UK. The 2013 first quarter survey took place between 14th and 28th March. 120 CFOs participated, including the CFOs of 26 FTSE 100 and 44 FTSE 250 companies. The rest were CFOs of other UK-listed companies, large private companies and UK subsidiaries of major companies listed overseas. The combined market value of the 69 UK-listed companies surveyed is £671 billion, or approximately 32% of the UK quoted equity market.

The Deloitte CFO Survey is the only survey of major corporate users of capital that gauges attitudes to valuations, risk and financing. To join our panel of CFO respondents and for additional copies of this report, please contact Tulaine Trimble on 020 7007 1684 or email ttrimble@deloitte.co.uk
